- Baliuag, Bulacan

Skills

Technical Skills:

- Programming Languages: PHP, JavaScript, HTML, CSS
- Frameworks & Libraries: CakePHP, Laravel, jQuery, React
- Databases: MySQL
- Tools & Platforms: AWS (S3, EC2, API Gateway, Image Recognition, Quicksight), Docker, Git
- Methodologies: Agile, CI/CD, Test-Driven Development (TDD), RESTful API Development

Leadership & Soft Skills:

- Team Leadership, Mentorship, Technical Decision-Making
- Code Review, Quality Assurance
- Cross-Functional Collaboration, Project Roadmap Development

Professional Summary

Full Stack Developer with over 6 years of experience building and optimizing scalable backend systems using PHP, CakePHP, MySQL, and AWS, alongside dynamic front-end development with JavaScript, jQuery, React, and CSS. Skilled in Agile development, CI/CD implementation, and writing clean, maintainable code. Experienced in mentoring junior developers and collaborating cross-functionally to deliver high-quality applications on time. Passionate about problem-solving, performance tuning, and delivering impactful software solutions.

Experience

- Software Development Leader**
Trade Dynamics Consulting Int'l Inc 2021 - Present
 - Mentored junior developers through 5,000+ code reviews, enforcing coding standards and improving overall code quality by 30%.
 - Collaborated closely with product managers to define project roadmaps, aligning technical execution with business objectives and stakeholder expectations.
 - Oversaw the enhancement and maintenance of 10+ web applications serving the fast-moving consumer goods (FMCG) sector, spanning administration, ticketing, logistics, asset and project management, and API integrations. Worked with a team of 6 developers to consistently deliver updates on time and with high client satisfaction.
- Software Developer**
Trade Dynamics Consulting Int'l Inc 2020 - 2021
 - Resolved coding issues and reduced post-deployment bugs by proactively troubleshooting, debugging, and testing, leading to more stable and efficient software releases.
 - Modernized legacy codebases to meet current development standards, improving overall functionality, maintainability, and team productivity.
 - Collaborated with cross-functional teams and contributed to a positive team culture through effective communication, problem-solving, and on-time delivery under tight deadlines.
- Jr. Software Developer**
Nityo Infotech 2019 - 2020
 - Built and customized features for existing web applications, delivering tailored solutions based on specific client requirements.
 - Improved application stability and performance by identifying and resolving bugs through systematic testing and debugging.

Education

- Bachelor of Science in Information Technology**
ICCT Colleges Foundation Inc. 2014 - 2017
 - Developed a web application during On-the-Job Training (OJT), gaining hands-on experience in real-world software development.
 - Designed and built a mobile application as a capstone thesis project, showcasing proficiency in end-to-end app development.
 - Gained foundational knowledge in software engineering, databases, networking, and system analysis.
