JOHN MICHAEL GEMINO

PHP SENIOR API DEVELOPER

Baliuag, Bulacan | johnmichaelgemino.dev@gmail.com | +63 992 594 3915 | Portfolio

PHP Senior API Developer with 7+ years of experience building and maintaining backend systems, REST APIs, and data-intensive business workflows using PHP, CakePHP, MySQL/MariaDB, and AWS. Proven record of delivering urgent and critical enhancements and resolving production issues on time for an Australian aged-care platform. Former development leader experienced in mentoring engineers, code review, and cross-functional delivery. Also builds mobile products through AI-assisted development, including Tranza, an offline-first Flutter Android application.

TECHNICAL SKILLS

- **Backend & APIs:** PHP, CakePHP, Laravel, REST API design, Node.js
- **Databases:** MySQL, MariaDB, PostgreSQL, SQLite, relational modeling, query optimization
- **Cloud & Integrations:** AWS (S3, EC2, API Gateway), Google Play Billing
- **Mobile & AI-Assisted Development:** Flutter, Dart, ML Kit OCR, offline-first architecture, AI-augmented development workflows
- **Frontend:** JavaScript, jQuery, React, Next.js, TypeScript, HTML, CSS, Tailwind CSS, Bootstrap, Material UI
- **DevOps & Collaboration:** Docker, Git, GitHub, Bitbucket, Jira, CI/CD, Agile, TDD, code review

PROFESSIONAL EXPERIENCE

PHP Senior API Developer, EMAPTA **Sep 2025 - Present**

Assigned to Abroad Source Pty Ltd, an Australian client

- Develop and maintain backend APIs and complex workflows for an Australian aged-care management platform.
- Consistently deliver urgent and critical enhancements and resolve reported production issues within agreed timelines, supporting reliable day-to-day client operations.
- Implemented and enhanced workflows for claims and statements, payment reconciliation, invoice exports, funding sources, scheduling and staff leave, and quote management.
- Improved data accuracy and system reliability by handling complex business rules, edge cases, validations, migrations, deduplication, and performance-sensitive queries.
- Collaborate with Australian stakeholders, support teams, QA, and engineers to analyze requirements, review code, test fixes, and deliver safe production releases.

Software Development Leader, Trade Dynamics Consulting Int'l Inc **2021 - Sep 2025**

- Mentored junior developers through 1,900+ code reviews.
- Improved code quality and maintainability through structured code reviews and technical mentoring.
- Oversaw 8+ web applications for the FMCG sector.
- Consistently delivered updates on time with high client satisfaction.

PROFESSIONAL EXPERIENCE - CONTINUED

Software Developer, Trade Dynamics Consulting Int'l Inc **2020 - 2021**

- Reduced post-deployment bugs through proactive troubleshooting.
- Modernized legacy codebases for better maintainability.
- Contributed to positive team culture and on-time delivery.

Junior Software Developer, Nityo Infotech **2019 - 2020**

- Built and customized features for existing web applications, delivering tailored solutions based on specific client requirements.
- Improved application stability and performance by identifying and resolving bugs through systematic testing and debugging.

EDUCATION

BS in Information Technology, ICCT Colleges Foundation Inc **2014 - 2017**

- Built a mobile application as a capstone thesis project.
- Developed a web application during OJT.
- Gained foundational knowledge in software engineering, databases, networking, and system analysis.
